

FOR MEDSPA PROVIDERS

Plasticized numbing creams

Patient or clinic-use topical anesthetic support for aesthetic workflows.

For patient or clinic use

Custom formulas can be made to the prescription, including Lidocaine 23% / Tetracaine 7% when appropriate.

TOPICAL ANESTHESIA SUPPORT

Compounding support for professional medspa settings.

- ✓ **Custom formula flexibility**
Formulas can be tailored to prescriber request and pharmacist review.
- ✓ **Patient or clinic-use options**
Requests are reviewed for applicable law, clinical fit, and prescription details.
- ✓ **Local pharmacy coordination**
Work directly with a Bradenton compounding pharmacy.

HOW IT WORKS

Simple Rx intake

- 1 Call the pharmacy**
Discuss workflow and prescriber needs.
- 2 Send prescription**
Prescriber submits patient-specific order details.
- 3 Compound & coordinate**
Medication is prepared after pharmacist review.

Valid prescription required. Clinic-use availability is subject to applicable law and pharmacist review.

Coordinate numbing cream prescriptions
